

Fact sheet

Tognum: Products and brands

The Tognum Group is one of the world's leading supplier of high-speed engines, propulsion systems and distributed energy systems, using diesel engines with a power output of up to 9,100 kW, gas engines with up to 2,150 kW, stationary fuel cells with up to 345 kW and gas turbines with up to 45,000 kW. The portfolio also includes fuel injection systems.

The brands at a glance:

- Under the name MTU, the Tognum Group sells its high-speed diesel engines and propulsion systems for ships, heavy land and rail vehicles, military vehicles and the oil and gas industry.

- MTU Onsite Energy stands for diesel gensets for emergency standby power, prime power and continuous power, as well as cogeneration power plants on the basis of gas engines, fuel cells and/or gas turbines.

- L'Orange stands for technological leadership worldwide in the field of high-pressure injection systems for diesel and heavy fuel oil engines in the off-highway segment. They make it possible to combine low pollution emissions with low fuel consumption and a long service life.

The brands MTU Onsite Energy and L'Orange belong to the Tognum business unit Onsite Energy & Components.
